

Last digit of a Number,

```
#include <stdio.h>
int main() {
    int num, last Digit;
    printf("Enter a number");
    scanf("%d", &num);
    last digit = number % 10;
    printf("The Last digit is : %d\n", cast digit);
    return 0;
}
```

Output :

12345

Last Digit = 5
